Strip-Brite Discs

The Strip-Brite discs are typically used for paint and coating removal and feature the quick & easy twist-to-lock mounting. The disc is an open-web construction impregnated with silicon carbide to provide aggressive and long-lasting performance. The extremely durable, three-dimensional web has a soft edge, allowing it to remove paint and other coatings in those difficult & unreachable creases & dents while removing very little metal. These discs are great for stripping paint without damaging the metal, especially on aluminum.
